
Watercare's new head office

Watercare Services Limited is responsible for providing water and wastewater services to the greater Auckland region, and employs a large number of people across many different teams.

We acted for Watercare in relation to its new head office premises located in Newmarket, Auckland. This was a significant project, involving the negotiation of a comprehensive redevelopment agreement and subsequent deed of lease, and further extensive advice in relation to Watercare's ability to terminate its existing tenancies at that time.
